

# JASON CHI LUU

Nationality: British | Email: jasoncluu@gmail.com | Website: [jasonspd.github.io](https://jasonspd.github.io)

---

## SKILLS

- Core skills - HTML5, CSS3, Javascript, NodeJS
  - Frameworks and libraries I've learnt - jQuery, React, AngularJS, express, hapi, Bootstrap
  - Other skills - Photoshop, MongoDB, AWS, Git, SVN, Gulp, Grunt, Heroku, Sass, Less
- 

## WORK EXPERIENCE

- April 2015 - Present **Freelance - Freelance Web Developer**  
- After graduation, I became a freelance developer working on MVPs and private projects
- Squish Project - Commercial MVP App**  
- Our client wanted an app to remind students when their notes are due to be revisited  
- He runs workshops that believe in revisiting notes 1, 7 and 30 days after they were written  
- Our 4-man team used ReactJS with Flux, NodeJS, Hapi, MongoDB, Nodemailer, MomentJS  
- Users login using Google auth, notes are written and saved in a NoSQL database  
- Users will receive email reminders, plus see their dates and notes on a custom calendar  
- Progress is tracked and points are rewarded for viewing all their notes on the correct day
- Stockport Suicide Prevention Project - Commercial MVP Website**  
- Our client wanted a responsive and accessible website, with simple functionality  
- Our client had detailed design wireframes and style guides for us to implement  
- Our team of two used Jekyll, Bootstrap, Flexbox, Github pages and prose.io  
- Our end product is a beautiful and resourceful website allowing easy content editing
- Aug 2015 – Nov 2015 **WCRS | Integrated Marketing and Advertising Agency – Web Developer**  
- 4 month contract, working with the Apple team within WCRS  
- Front-end quality control, testing, error and bug fixing under tight design specification  
- Rapid familiarisation with a large, unfamiliar codebase and resource management system  
- Technologies involved HTML5, CSS3, SVN and Photoshop  
- Worked abroad in San Jose with Apple in early September for their iPhone 6 launch
- Jan 2015 – Nov 2015 **Founders and Coders – Full Stack Freelance Web Developer**  
- Selected for an eight week competitive web development course  
- Learned JavaScript and how to build web applications using NodeJS  
- Every week was a new project and/or a new framework, to develop constant learning  
- A further 8 weeks were spent working on commercial MVPs for real clients  
- After graduation, I became a freelance developer working on MVPs and private projects
- Jan 2014 - Present **Private tutoring - Maths and Science Tutor**  
- Tutoring 4-5 students aged 8-16, from primary to GCSE level Maths and Science weekly
- Jul 2014 - Dec 2014 **Sandwich Shop - Customer Sales**  
- Worked part time at a sandwich shop, serving customers, cleaning the store, handling money and taking deliveries
- Jan 2014 - Jun 2014 **Takeaway - Cashier**  
- Worked part time at a takeaway, answering phone call orders and taking orders
- Sep 2010 - Apr 2011 **University of London Officers Training Corps - Officer Cadet**  
- An army reserve at university, being paid to train and learn leadership skills
- 

## EDUCATION

- 2010 – 2013 **Queen Mary, University of London**, DipHE in Aerospace Engineering  
2009 – 2010 **Kingston University London**, Foundation year in Aerospace Engineering  
2007 – 2009 **Woodhouse College**, 3 A-Levels in Mathematics, Physics and IT  
2001 – 2007 **Swanlea School**, 12 GCSEs - including English, Mathematics, IT and Chinese
- 

## INTERESTS

- Native speaker in English and Cantonese, with intermediate Mandarin
- Enjoy working with computers, constantly learning and is fascinated by new technology; love to travel, exercise and compete in sports
- Member of CCIL - Mentoring, volunteering and band practice leader for many years at my church
